

# SDC Summer Camp 2019

## **June 3 – 7: Reptiles and Amphibians**

Scaly and slimy doesn't have to mean scary! Reptiles and amphibians are some of the most misunderstood animals in the animal kingdom. Join us for a week of meeting our own reptile ambassadors in person, and discovering the reason for their spikes, slime and all the other features that make them so unique and interesting.

## **June 10 – 14: Around the World**

Spend the week exploring 5 different countries: Mexico and Piñatas, Ireland and Shamrocks, Australia and Boomerangs, Egypt and Pharaohs, & Italy and Pizza! Learn the games of each country, the food they eat and the culture they live in. We will challenge each camper to dress in their favorite country attire on Friday.

## **June 17 -20: Ooey, Gooey Sciences**

Ewww! Yuck! What's that smell? There is no place better than the Science and Discovery Center to experiment and learn about Science! Little scientists will learn about Biology, Chemistry, Geology, and Zoology, while doing many hands-on experiments and activities.

## **June 24 –28: Dino Dig**

Welcome all future Paleontologists! This week will be fun packed with Dinosaurs. Our researchers will learn about different types of dinosaurs, create fossils, make volcanoes erupt, and practice their paleontology skills in our Dino Dig.

## **July 8 -12: Harry Potter and the “Magic” of Camp**

Congratulations on your acceptance to the SDC school of Witchcraft and Wizardry! Collect your wand and broom to begin exploration of the same subjects Harry Potter learned: Herbology, how to care for Magic Creatures, charms and potions, and art. Participate in the creation of magical spells and potions.

## **July 15 – 19: Buggin' Out**

Did you know about 80% of animal species on Earth are bugs? Join us as we explore the world of creepy crawlers. We will learn how insects provide natural services for us that we take for granted. They are pollinators, undertakers, decomposers, garbage collectors, and natural fertilizers of our planet. This week we will learn about different types of bugs, study their importance, and meet many cool and creepy, crawly critters.

## **July 22 – 26: Pirates, Mermaids and Under the Sea**

For hundreds of years pirates sailed the salty seas looking for treasures. This week we will learn about the oceans, decode a pirate map, plan for a voyage, discuss how pirates survived on the water, and explore the truth of mermaids. Further, we will explore the underwater sea life and have special visitors.

## **July 29 - Aug 2: Barnyard Palooza**

Learn about life on a farm and what role farm animals have. Throughout this week, kids don't just learn about the animals, they interact with them! This week will have many animal visitors to make this learning experience more memorable.
